

February 16, 2016

- * work each problem vertically on the left.
- * Check each problem on the right.
- * Note the Algebra tool you are using.

Feb 16-9:07 AM

$$6 = 1 - 2m + 5$$

$$= (1 + (-2m)) + 5$$

$$= ((-2m) + 1) + 5$$

$$= -2m + (1 + 5)$$

$$6 = -2m + 6 \quad \text{Assoc./Comm}$$

$$\frac{0}{-2} = \frac{-2m}{-2} \quad \text{A.D.}$$

$$0 = m \quad \text{m.I.}$$
