#3) $\frac{\frac{1}{x} + \frac{1}{x}}{\frac{1}{x}} = T$, for \ominus

* an equation that contains a fraction.

① $\frac{\frac{1}{x} + \frac{1}{x}}{\frac{1}{x}} = T$ Least Common Denominator (LCD) = x

$\left[\frac{x \cdot \frac{1}{x} + x \cdot \frac{1}{x}}{x \cdot \frac{1}{x}} \right] = \frac{x \cdot T}{x}$

$\frac{1 + 1}{1} = \frac{x \cdot T}{x}$

$\frac{2}{1} = \frac{x \cdot T}{x}$

② $\frac{2}{1} = \frac{x \cdot T}{x}$ Dist

③ $2 = \frac{x \cdot T}{x}$ m.d.
