

③ (cont.) * This is a process known as the Columbian Exchange

- more positively, the new global network allows for an enormous exchange of plants and animals ~~from one~~ between different regions. * Cows & horses were introduced in the Americas, prompting significant changes in ~~the~~ American ~~economy~~ economics & societies. American food crops are now exported all over the world, bringing sweet potatoes, potatoes & maize (corn) ~~to the rest~~ ~~of the~~ into the European, Asian & African diet for the first time - these new foodstuffs ~~see~~ ~~but~~ encourage both dramatic changes in agricultural techniques, and also set the stage for ~~such~~ rapid and prolonged World Population Growth.
